SEEDS Project Coordinator*

ABOUT US

21 COMPLETED R&D PROJECTS

25 ONGOING R&D PROJECTS

6 COORDINATING PROJECTS

+46 R&I Projects
€45Mio

Since 1987 we combine passion and experience to provide high quality consulting services contributing to build tomorrow's future through ground-breaking R&I projects.

Understanding vulnerabilities

Maps of cereal supply & value chains and drivers of change (macro–meso–micro)

Identification of shocks, disruptions & critical infrastructures affecting food security

Digital tools for risk-informed decisions

Smart AKIS model, digital supply-chain platform & AI-based recommendation system for real-time monitoring

Better data sharing, transparency and traceability from farm to fork

Safer, more sustainable products

Revival of at least 8 climate-resilient ancient cereal varieties and field trials with local farmers

New cereal-based products and consumer studies on healthy & sustainable choice

Evidence for policies & risk management

Life-cycle sustainability assessments (LCA, LCC, SLCA) of current and future chains

Policy-oriented Intervention Toolboxes and risk scores to support authorities

Shared evidence base

Share supply-chain maps, risk scores and LCSA results as inputs to EU food safety discussions

Joint reflection on cascading risks (war, climate, market shocks) and implications for safety

Digital tools & data

Test and adapt the SEEDS digital platform and AKIS model with EU FSS actors

Explore interoperability with existing EU food safety / traceability data systems

Policy & best-practice co-creation

Co-develop policy briefs, guidelines & best practices for resilient and safe cereal chains

Link SEEDS Intervention Toolboxes with EU food safety risk-management frameworks

Knowledge sharing & capacity building

Open the SEEDS Knowledge Centre & Communities of Practice to Platform members

Joint webinars, workshops and training on shocks, resilience and consumer communication

Short term

Invite Platform members to SEEDS Knowledge Centre and events

Set up a joint working group on cereal-chain resilience & food safety links

Pilot use-cases: e.g. using SEEDS risk insights in EU food safety discussions

Medium term

Build a cluster with related EU projects & EU FOOD SAFETY PLATFORM

Co-design follow-up projects on digitalisation, traceability & risk communication

Use SEEDS outputs as demonstrators for EU Farm to Fork / FOOD2030 goals

Our ask today

Indicate who would be interested in:

co-creating best practices, testing digital tools, or shaping joint calls / proposals

Thank you!
